

Topic Synopsis

Addition Of Three Digit Numbers

- We learn to add three-digit numbers through the concept.
- The digits are placed under Ones, Tens and Hundreds columns, respectively, and then are added column wise.

Example 1: There are 142 rose plants and 130 jasmine plants in a garden. To find the total of these two plants, we put them under Ones, Tens and Hundreds column and then add.

HTO

142 **rose**

130 **jasmine plants**

272 **total plants**

The total number of plants in the garden are 272.

Example 2: Radhika, Sanjam and Kartik were making a necklace. Radhika had 130 yellow beads, Sanjam had 145 red beads and Kartik had 121 blue beads. To find the total number of beads, we will calculate in the following way.

HTO

130 **yellow beads**

+ 145 **red beads**

121 **blue beads**

396 **total beads**

The total number of beads are 396.
